

# Hearing Health Assessment

## New Patients

In our professional experience, we have found that many of our patients describe hearing loss as the perception of Sound Voids®, a moment lacking clarity in hearing or understanding. This affects not only their normal daily routines but the lives of those around them. We would like to ask you a few situational questions to better understand your listening lifestyle and how we might improve your quality of life.

Below are four listening lifestyles that range from frequent to rare background noise you might experience throughout your day. When you think about your daily activities, in addition to your less frequent but important activities, which lifestyle best describes you now and where you'd like to be?

### Please select your current lifestyle and your desired lifestyle.

#### Active Lifestyle (Frequent Background Noise)

- Current     Desired

#### Casual Lifestyle (Occasional Background Noise)

- Current     Desired

#### Quiet Lifestyle (Limited Background Noise)

- Current     Desired

#### Very Quiet Lifestyle (Rare Background Noise)

- Current     Desired
